

Automatic Pneumatic Timers

for industrial vibrators

NAVCO Automatic Pneumatic Timers (APT) are available in 1/2" and 3/4" sizes to adapt to a wide range of applications.

Many materials respond to intermittent vibration better than continuous. For this reason NAVCO offers the APT to cycle vibrators on and off. This unit is especially suited for hazardous environments.

The NAVCO APT unit needs no electrical connections. It is completely air controlled and has a variable on/off cycle time from 1 second to 15 minutes with independent adjustments. It meets all explosion proof requirements.

- No electrical circuits required
- No alternate air circuits required
- Completely automatic

Specifications:

Time Range:	ON 1 sec. – 15 min. OFF 1 sec. – 15 min.
Pressure Range:	30-150 PSIG
Temperature:	0° to 150° F
Thread Size:	1/2" or 3/4" NPT
Dimensions:	10" x 6" x 3"
Weight:	4 lbs.
